One of the stimuli that needs to be done to increase the ability of students in the field of science, especially Biology, is to hold an Olympiad Event. The *Indonesia Scientific Society (ISS)* is an institution that is concerned with advancing the world of science in Indonesia. To improve the abilities of Indonesian students in the field of science, the Indonesia Scientific Society (ISS) is ready to hold the ***International Applied Biology Olympiad (IABO)***.

AIBO is a means of improving the abilities of international students in the field of science, especially Biology. International students are tested for their skills and dexterity in doing biology problems which can foster a positive attitude, especially in terms of critical thinking and being scientific. This Olympiad s was held online because of the Covid-19 pandemic situation, but was still under close surveillance.

# Vision and Mission

## Vision

To become a prestigious international biology olympiad that fosters scientific excellence, innovation, and global collaboration among young scientists in advancing applied biology for a sustainable future.

## Mission

1. To provide a competitive platform that enhances students' analytical, critical, and scientific thinking skills in biology.
2. To encourage students to apply biological concepts in solving real-world problems through applied science approaches.
3. To identify and nurture talented students in biology who are ready to compete at the international level.
4. To promote collaboration and cultural exchange among students from different countries through scientific activities.
5. To support the development of future scientists who contribute to global challenges in health, environment, and biotechnology.

# Purpose

---

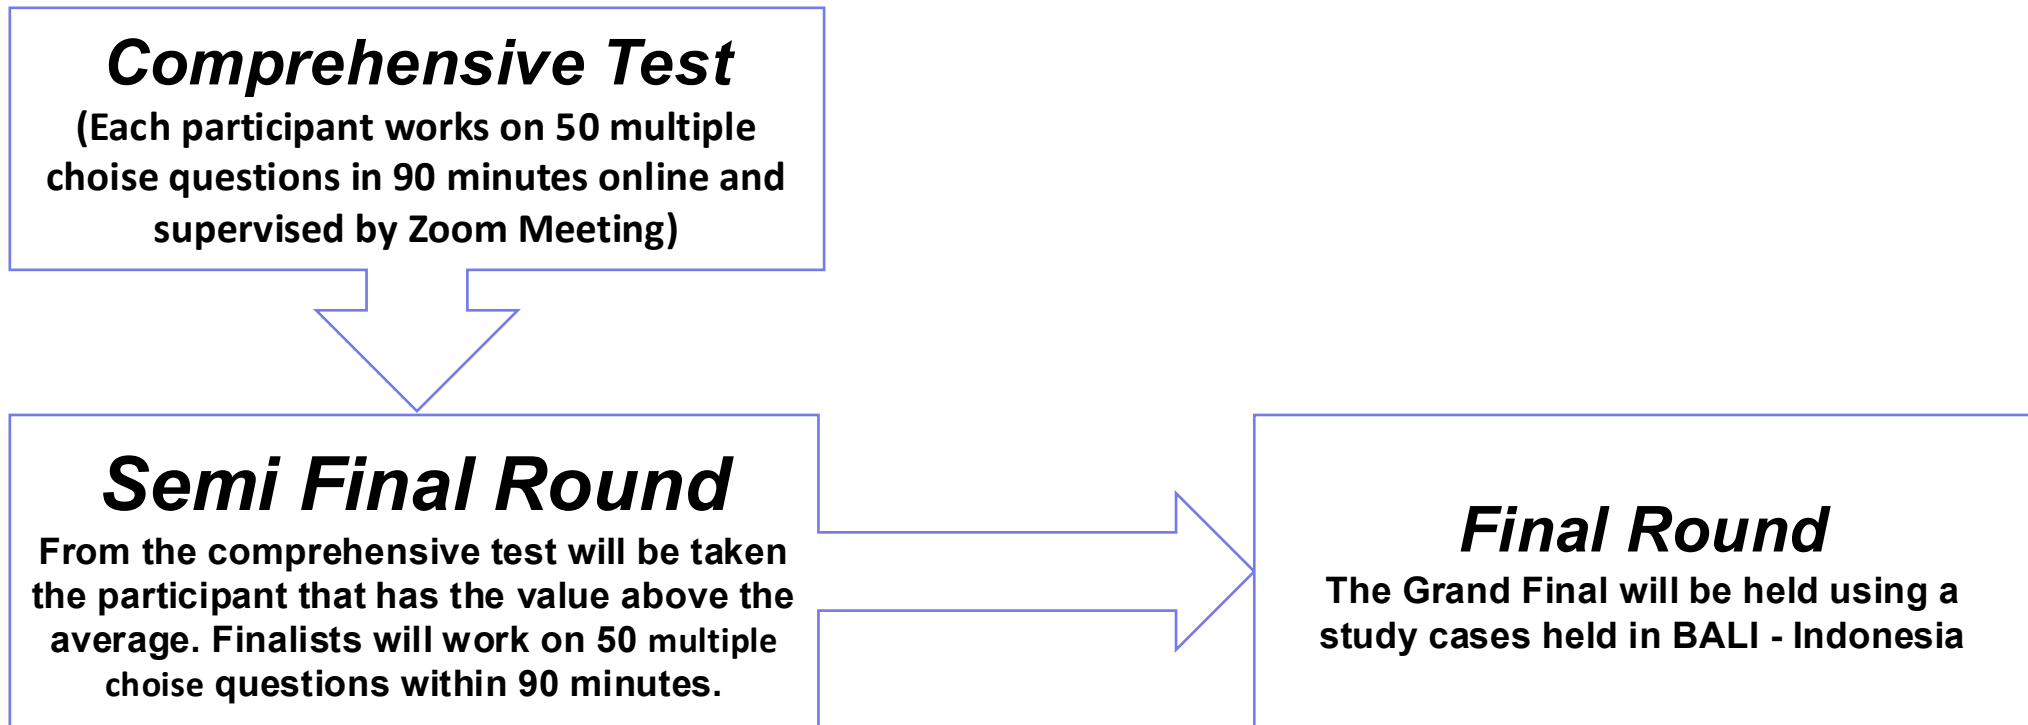

The objectives of the AIBO are:

- ❑ Fostering a positive attitude, especially in terms of critical thinking and being scientific through the challenges of solving biology problems.
- ❑ Give birth to the best students in the field of biology who are ready to compete at the international level.
